EDUCATION

Al-Quds University- Jerusalem, Palestine BS Computer Science, June 2007

PROFILE SUMMARY

Dynamic IT Consultant and Team Lead with 15+ years of experience in **Enterprise Content Management (ECM), SharePoint, and enterprise digital transformation** UAE. Proven expertise in **ECM consulting, project management, and leading cross-functional teams** to deliver innovative solutions that streamline operations, drive automation, and support strategic business goals.

Extensive hands-on background in **SharePoint (On-Premise & Online), Power Platform, Nintex, and enterprise integration**, combined with strong leadership in Agile/Scrum environments. Experienced in engaging directly with executives and stakeholders, gathering complex business requirements, and translating them into scalable technical solutions.

Strong record of success in **process automation, enterprise architecture, and cloud adoption strategies** (Azure, Power Platform, DevOps). Skilled in bridging the gap between business and technology by preparing BRDs/FRDs, process mapping, and data-driven analysis, ensuring alignment of IT solutions with organizational strategy.

Completed professional trainings in PMP, Scrum Master, ISTQB, and Microsoft technologies, alongside Data Science and Machine Learning courses, enabling advisory roles in both **digital transformation and data-driven decision-making**.

Strong background in **business analysis, process mapping, and documentation (BRD/FRD)**, bridging business needs with technical implementations. Completed professional trainings in **PMP, Scrum Master, ISTQB, and Data Science**, supporting both **consulting and leadership roles** in digital transformation initiatives.

ACHIEVEMENTS

- Collaborated closely with business users to gather requirements and understand their needs, ensuring developed solutions aligned with organizational objectives.
- Developed custom solutions both in on-premise and cloud (SharePoint Online) environments to meet specific organizational requirements.
- Designed and implemented cloud-based workflows using Nintex Workflow for SharePoint Online, automating business processes and significantly increasing efficiency and productivity.
- Created intuitive, cloud-enabled forms using Nintex Forms and Power Apps, facilitating seamless data collection and workflow initiation.
- Automated repetitive tasks and processes across various cloud and on-premise systems using Power Automate, reducing manual effort and minimizing errors.
- Leveraged Power BI for cloud-based data visualization and analysis, creating interactive dashboards and reports that supported informed decision-making.
- Worked with cross-functional teams to gather requirements, analyze business needs, and deliver tailored solutions within agreed timelines.
- Provided technical guidance and support to end-users on cloud-based solutions, ensuring smooth adoption and optimal utilization of SharePoint Online and other cloud tools.
- Conducted training sessions to empower users in maximizing the potential of SharePoint Online, Power Platform, and other cloud-based tools.
- Tracked project execution and task progress using JIRA, ensuring transparency and accountability in project management.
- Participated in design discussions concerning cloud and on-premise application architecture, feature implementation, and other relevant topics to ensure optimal outcomes.
- Applied **Agile methodology**, facilitating exercises such as **sprint planning, pair programming,** and **daily standups** for continuous improvement.
- Developed and maintained enterprise architecture models using **MEGA HOPEX**, contributing to the organization's overall IT strategy and cloud integration.
- **Monitored project progress and task execution using JIRA**, ensuring transparency and accountability.
- **Contributed to architectural and design discussions** for cloud and on-premise solutions, influencing feature implementation and ensuring optimal outcomes.
